Will You Teach?

Mike Anderson, WV7T

I have seen an increase in the number of folks wanting to get or advance their amateur license over the past year. With 3 students on Monday night for the Technician, 3 for General and 3 for Extra on

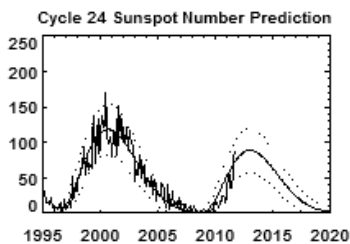

Sunday afternoons, I see the demand for instructors is increasing. We all having passed our exams are fully qualified to share what we have learned and our experiences which adds to the knowledge. In PPRAA, education is one of our primary goals. It is easy to teach and the rewards are great. I would like to find a few volunteers who would like to teach a class and meet with them to discuss running a class and what class they would like to teach. Amateur Radio will only grow with more licensed hams, we need to be proactive in this. Folks might only teach one class with the class just being one hour a week to get students on the way to their license. In my classes I will teach one of each license for 3 months then take the next 3 months to teach hands-on practical ham skills. Perhaps there are hams out there that could do classes while I am teaching the hands-on so no person who desires to be a ham has to wait.

If you are interested in possibly teaching a class please contact me.
